On Demand Child Care Training

Featured module:

An amazing transformation takes place during the first 2,000 days of a child’s life - the time between when a child is born and the first day of kindergarten. Research shows that a combination of biology and experience contributes to all aspects of a child’s development. Many experiences for young children occur within the context of relationships, and relationships are important for building a strong foundation for learning. Explore how you can support this amazing transformation. (K1.4 C2, CDA8) 2 Hours

Learn to:

• Determine how brain research can help inform decisions about best practice and quality care in early childhood.
• Discover how biology and experience interact to produce different developmental outcomes for children.
• Distinguish how children’s learning happens within relationships.
• Identify practices that support strong everyday interactions with children to build healthy outcomes and support all learning.

Content for this and 200+ other On Demand professional development modules is available at no cost. If a certificate of completion is needed or required, a $5.00 fee is charged.
